(option)

JR-1208P allows to wirelessly receive AV signal outdoors to avoid any return loss caused by cable installation. (option)

Feature

FS-EVD III PLUS

- ▶ The OD8mm insertion tube with IR camera on the tip allows to access to unreachable space to do 360° detection and display the finding on 2.4" LED for monitoring / recording / transmission. Motion detection recording available.
- ▶ With bending angle above 120° on each way to do 360° full direction monitoring. Compact, single hand operation allowed.
- ▶ The tube and camera is designed to immerse to water and protected by reinforced polyurethane to resist oil/acid/alkali.
- ▶ Application: pistol checking, industrial inspection, law enforcement assaulting, raid & anti-terrorism, vehicle repairing, ecological research...etc.

FS-EVD Super(A)(B)

- ▶ Feature OD5.8mm slim tube, (A)visible light/(B)invisible light source, 3.5" LCD, 6h battery running hour and individual function key for monitoring, recording, snapshot and transmission.

Application

Insertion length/depth indication on tube skin

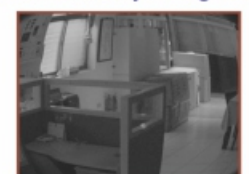

4 way articulation, turning space is minimized

IR illuminator and camera is individually designed

158° extra wide viewing angle

Auto convert into IR mode under low light condition
