Ranging scales for fast distance calculation

- Feature in high light transmittance and sharp image by utilizing high precision BAK4 lens.
- The high brightness is ideal for clear observation in night-time or low light condition.
- Automatic focus design.
- Meet IP67, with ability to immerse to water and float on the water.
- Allow to take the photograph by positioning mobile phone in front of the eyepiece with extra large caliber.
- Integrated range reticle & compass with illuminating function.
- Fitted with ranging scales to meet distance calculation purpose.

The large eyepiece can work with various camcorders

No focus adjustment is needed. Allow to snapshot and record by mobile and camcorder.

The Nitrogen is filled to prevent from a foggy lens

Reticle

Illuminated compass

Specifications:

Objective Dia.	50mm
Magnification	10x
Field of View	7.5°
Eye relief	22mm
Inter-pupillary Distance	56-72mm
Exit pupil diameter	7.1mm
Resolution(Center)	≤5°
Lens coating	Multi-layer of coating
Closest focusing range	5m
Prism glass	BAK-4
Sealed & filled with Nitrogen gas	√
Built-in functions	Reticle, compass with illumination
Diopter adjusting range	-5 ~ +5
Size	187(L)x80(W)x145(H) mm±5mm
Weight	≤900g

- Standard package :**
- 1. Main unit
 - 2. Eyepiece cap *1
 - 3. Objective lens cap *2
 - 4. Battery *2
 - 5. Carry bag *1
 - 6. Floatable sling *1
 - 7. Lens cleaning cloth *1
 - 8. Manual *1
