

RAYSUN Bola Launcher

Effective range of 10m

Patented bola Kevlar

Easy to reuse

Features

- An Effective remote restraint device allows to entangle the target within 1/2 second at a range of 10m.
- The patented high-tensile Kevlar tether with barbed-foot is helpful to make an accurate shot while tangle-free on the cord, which makes reuse easier.
- No pain and bodily harm is caused on impact, ideal for subduing unruly target.
- Easy to use, only simple training is required.
- Use 8g N2O gas bottle, no ammunition is used.
- Compact, light and portable, suitable for crucial urgent use with its quick-release belt clip design.

Specification
