

# RAYSUN M4

## Multifunctional Paintball Rifle

Short barrel

Long barrel

 0.68" Pepper ball	 Fin stabilized pepper ball
Rubber ball	Fin stabilized rubber ball
Training ball	Fin stabilized training ball
Paintball	
Blast ball	

### Feature:

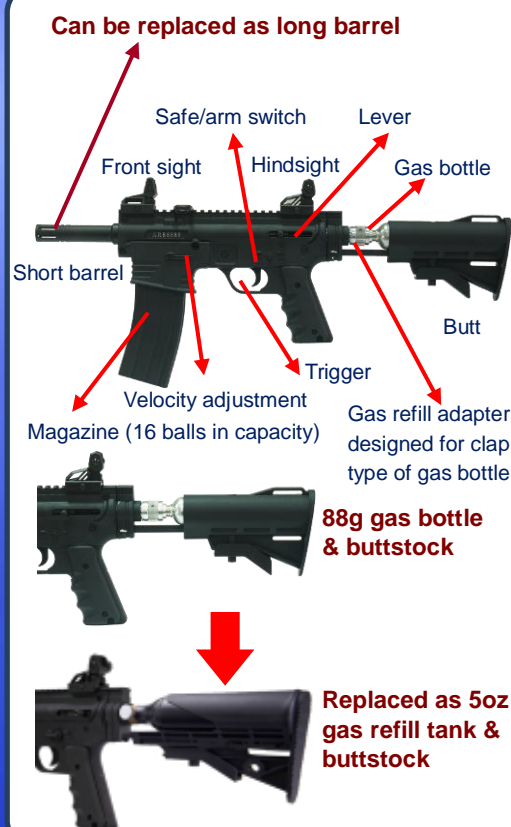

- M4 is a reliable milsim paintball gun allowing for feeding both regular caliber 0.68" paintballs and fin stabilized balls to help make an accurate shot at a long distance.
- Provide various kinds of balls to meet different purpose.
- The modularized design avoids the hassle of defective trouble.
- The only type in the market to include long barrel and short barrel, both can be interchanged for different mission, short barrel can be used as a sniper, while long barrel can have a effective range up to 40m if select fin stabilized balls.
- Permit to install disposable 88g gas bottle ("clap" to break gas bottle for immediate use) or refillable 5OZ gas tank in the buttstock; the gas refill bottle can be removed for reuse.
- Allow to adjust the front sight and hindsight depends on the barrel length.
- Quick-release & install design.
- Easy to carry and maintain.

*Note: Do not use the fragile type of balls to prevent the device from being stained by the ball powder if get broken on impact.*
